THIRD COUNTRY TRAINING PROGRAMME

✦ COURSE TITLE

Knowledge Creation Forum on Community-based Inclusive Development 2015

✦ GENERAL OBJECTIVE

Empowerment of young persons with intellectual disabilities, autism and hard of hearing in Southeast Asian countries from the perspective of Community-based Inclusive Development (CBID)

✦ TRAINING OBJECTIVES

- 1) To develop the capacity of young leaders with autism and their parents in Southeast Asia by providing opportunities to enhance understanding of the CBID concept;
- 2) To provide a forum for young leaders with autism and their parents by exchanging information and knowledge on not only autism but also other emerging disability groups, such as persons with intellectual disability and/or persons who are hard of hearing;
- 3) To strengthen regional collaboration between the members of ASEAN Autism Network (AAN) and APCD, in collaboration with TICA and JICA, with support from MSDHS, particularly by promoting their participation in recreation, leisure and sport.

✦ EXPECTED OUTCOMES

- 1) Young leaders with autism and their parents in Southeast Asia will gain information and knowledge on disability and development in the CBID context, including other emerging groups such as intellectual disability and hard of hearing, and will be prepared to utilize this new knowledge locally in their home countries;
- 2) New information and knowledge on recreation, leisure and sport will be created, exchanged and elaborated on by young leaders with autism, their parents and resource persons in Southeast Asian countries and Japan for future implementation.

Executive Summary

The Third Country Training Programme (TCTP): Knowledge Creation Forum on Community-based Inclusive Development 2015 (Capacity-building of Persons with Autism and their Parents) was organized by the Asia-Pacific Development Center on Disability (APCD), in collaboration with the Japan International Cooperation Agency (JICA) and the Thailand International Cooperation Agency (TICA) of the Ministry of Foreign Affairs of Thailand, with support from the Ministry of Social Development and Human Security of Thailand (MSDHS).

Twenty youth with autism and their parents, as well as four Personal Assistants from ASEAN countries including Cambodia, Lao PDR, Myanmar, Philippines, Thailand, and Vietnam participated actively in the historic, first of its kind international training at the APCD Training Building in Bangkok, Thailand from 12 to 25 July 2015.

Collectively, the Training participants were able to create new information and knowledge on leisure, recreation and sport through experience sharing, expertise and wisdom exchange on various autism-friendly activities to develop their capacity, as well as valuable time spent together.

The resource persons included Mr. Nobunao Kinugawa (Autism Society Japan), Mr. Michael Schultze (Association for Autism in Lao PDR) and six Thai resource persons with intensive experiences in the relevant field.

Young leaders with autism and their parents from different ASEAN countries got unique knowledge and experiences, and developed their capacities through autism-friendly activities. Moreover, the Training provided participants an opportunity to learn the perspective of persons with hearing loss and intellectual disabilities by exchanging new information and knowledge on hearing loss and intellectual disability.

The learning outcomes were elaborated during the "Consensus Building" session. Training participants agreed to have several autism-friendly activities from the classes to enjoy their participatory activities in the next AAN Congress to be conducted in the Philippines.

An action plan and country report were presented by each group of participants per country. Furthermore, the Bangkok Recommendations on Recreation, Leisure and Sports for Persons with Autism in the ASEAN region was presented and unanimously adopted by Training participants as a consensus, particularly concerning the next proposed Congress in January 2016.

The Training concluded with a memorable closing ceremony by demonstrating an inclusive and friendly recreation based on the learning from the Training, following with the reading of the Bangkok Recommendations by all self advocates with autism, awarding of Training certificates and closing remarks by representatives from JICA, TICA and MSDHS, respectively. Finally, participants exchanged contacts and souvenirs for future networking, and captured final memories together through group photo sessions.

Key Outcomes

1. Young leaders with autism and their parents were provided with great opportunities to exchange various autism-friendly activities on recreation, leisure and sport from ASEAN countries and Japan.
2. In accordance with the participants' consensus, at least four autism-friendly activities from the international Training (friendly rules/competition, award) will be presented in the 3rd ASEAN Autism Network (AAN) Congress in the Philippines.
3. Country reports on the autism movement of each country and action plans for implementation at the community level were developed and presented.
4. The Bangkok Recommendations on Recreation, Leisure and Sports for Persons with Autism in the ASEAN region was developed and adopted.
5. Networking among young leaders with autism, their parents and resource persons from Southeast Asia and Japan was strengthened.
6. The outline of the next AAN Congress has been drafted by the participants as their consensus.

Bangkok Recommendations on Recreation, Leisure and Sports for Persons with Autism in the ASEAN region

We, the representatives with autism, their parents and resource persons from Cambodia, Japan, Lao PDR, Myanmar, the Philippines, Thailand and Vietnam, in total 26 persons, participated in the Third Country Training Programme: Knowledge Creation Forum on Community-based Inclusive Development 2015 (Capacity-building of Persons with Autism and their Parents) by the Asia-Pacific Development Center on Disability (APCD), the Japan International Cooperation Agency (JICA) and the Thailand International Cooperation Agency (TICA), with support from the Ministry of Social Development and Human Security of Thailand, from 12 July to 25 July, 2015 in Bangkok, Thailand.

Noting that a basis has been built as a result of the Training to accelerate the regional movement on recreation, leisure and sports through the platform of the ASEAN Autism Network (AAN), we hereby unanimously recommend as follows:

Attention should be paid to persons with autism and their parents in developing laws and policies in each of ASEAN Member States, taking into consideration that the topic of autism is relatively new in some Southeast Asian countries;

With support from AAN members, the findings and consensus on recreation, leisure and sports during the Training should be reflected in the next AAN Congress in the Philippines, and other activities which could be organized in Cambodia, Lao PDR, Myanmar, Thailand and Vietnam, with an emphasis on a participatory way among persons with autism and their parents through their organizations.

*Presented and unanimously adopted at the Third Country Training Programme:
Knowledge Creation Forum on Community-based Inclusive Development 2015
(Capacity-building of Persons with Autism and their Parents)
24 July 2015, Bangkok, Thailand*

- Representing for person with AID, protecting their legal right, facilitating their participant, living and working activities.

បណ្តាញជំនុំការងាររវាងមនុស្សមានការរំខានចិត្ត និងមនុស្សមានការរំខានស្រួចស្រាវ
Cambodian Intellectual Disability and Autism

- New and Fragile
- No fund support
- Not yet fully involved with government sector
- CIDAN members not well understandable about the direction of CIDAN
- Parent fully depends on NGOs supports
- Autism Identification

- Establish CIDAN constitution CIDAN structural
- Develop and publish CIDAN booklet
- Develop specific activities for 3 years mandate through NDSP
- Government recognition and dissemination about CIDAN

- Build up the local and international network
- CIDAN mobilize its members to regular meet and take action
- Conduct workshop on parents movement

HELP WANTED!

- Cambodian Government
- APCD and international Networks
- Donors Agencies
- Relevant Stakeholders
- Parents Commitment

Conclusion

Children with AID and families were happy with this initiative of establishing CIDAN which we have a common voices and to enable to strengthen the work of persons of AID.

 School Advocacy

School Advocacy

Public Talk

- Parliament approved Disabled Law
It includes – inclusive education for all
 - Right for Person with Autism

Formed a national committee for disabled persons
Try to form a National Level Diagnosis Team
Develop a screening tool for Autism based on modified M-Chart

Challenges

- Don't know the Number of Autism, Incidence, Trend
- Informal observation – increasing trend
- Not include in the priority list of government
- Among disable groups- ID (autism) is not easily visible.

- Allocation of resources is less.
- Technical gap between Myanmar and other ASEAN countries is wide.
- Awareness is low in all level
- No Place for adolescent autism
- No special teacher in normal schools
- Very ,Very ,Very less work opportunity

BUT

WE TRY OUR BEST AS MUCH AS POSSIBLE

- Advantage:
 - Thai Autism Roadmap will be adhered to at least by Responsible Ministries by target year of 2017
 - Related ministries and other government offices will be follow-up in due course

Thank You for Your Attention

Q & A

Vietnam

Vietnam Autism Network

Programs and services:

- Developing the quantity and quality of VAN members: to act for people with autism
- Training parents of children with autism in both interventional theory and practice.
- Organizing events and campaigns to raise public awareness of autism

Vietnam Autism Network

Achievements

- 2013: established VAN in 6 province/cities; 2015: expand to 10 provinces/cities in Vietnam
- Continuous training courses were organized
- Collaborated with an NGO - Center for Creative Initiatives in Health and Population in a 2-year-project "Smart Care for children with Autism" since 2014
- Played important roles in some events (photos below)

"We can do it!" 2/4/2014

Festival for Family of Children with Autism

Communication workshop on Autism for Vietnamese Journalists 2/4/2015

"Sunrise for you" 5/2015

Vocational workshop for children with autism,

Organized by social enterprises

Art Exhibition of Children with Autism in Hanoi: Difference and Future 5/2015

Conference: Evaluate the impact of ASD in Hanoi and Solutions 2015

Parade in 4/2015

1. Vietnam Autism Network

Challenges

- No support from government
- Deficient experiences in the organization development and fund raising
- Weak public awareness of autism in Vietnam compared to other countries

Vietnam Autism Network

Future plans

- Social advocate for the right of people with autism: social welfare, autism is one of disability,
- Build the capacity for parents and people with autism
- Raise public awareness of autism
- Strengthen VAN regarding management and implementation methods.

2. Vietnam Context and Autism Disorder

Socialist Republic of Vietnam

- Population: 90 million people
- Culture: 54 different ethnics
- Religion: Multi-religion, no major religion
- HDI 2013: 0.638
- Potential development: Natural resources, culture imbued with national identity.

Social and economic context

- A developing country, economy developed rapidly recently
- Regional and international integration
- Social security policies are on process of completing

2. Vietnam Autism context

The implementation of the International Convention on the Rights of Persons with Disabilities (CRPD) and Incheon Strategy

- The law for Persons with Disabilities became effective since 01/01/2011
- However, autism has not been mentioned in the Law/any guideline. Most people with autism don't receive social welfare like other disabilities
- Ratification date: February 5, 2015

2. Vietnam Autism context

Situation of people with autism including the major government programs and services for persons with autism and their parents

-Limited accesses for persons with autism:

- Can study in public schools but without any special assistance.
- Limited public intervention center
- No vocational school system or center for adults.
- Some private services but expensive and not tested for quality
- Parents of autistic children are more likely to find and share the interventions themselves.

- There are few experts in autism

- Limited government programs or services

2. Vietnam Autism context

Current status and operational challenges of capacity-building of persons with autism and their parents

- Vietnam government does not provide any activity or support to improve the capacity for people with ASD and their parents.

-Vietnam lacks experts in autism and research on autism in many years.

Recreation, leisure, sports or games that are friendly for persons with autism

- No activities currently

3. Our expectations

1. Gain teaching and organizing skills to operate sport activities for Persons with Autism and their Parents
2. Achieve knowledge, experiences and advices to develop strategies on capacity building of Persons with Autism and their Parents
3. Ideas on vocational training for adults with Autism
4. Achieve knowledge, experiences and management approaches from other countries to strengthen VAN

4. Participants' Profiles
